DETAILED ACTION

Allowable Subject Matter

Claims 1-15 allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fail to anticipate or render obvious the following technical features as recited in the highlighted claims:

Referring to claims 1, 6, and 11, the prior art fails to teach or suggest "computing a bandwidth constrained frame rate from a frame size of an imager and a bandwidth of a link, where the bandwidth constrained frame rate is the rate at which frames may be transferred from the imager; and determining whether the computed bandwidth constrained frame rate is smaller than a frame rate requested from the imager, and if so, determining an integration time of pixels of the imager from the computed bandwidth constrained frame rate".
